Priority SDGs

There are 17 SDGs and 169 targets in total.

Our organization prioritizes SDGs 7, 12, 6, 11, 13, 10 and 15 aligning with our strategy and goals to drive sustainable practices. We focus on affordable and clean energy, responsible consumption and production, clean water and sanitation, sustainable cities and communities, climate action, and reduced inequalities, as we strive to create a greener campus and a more inclusive and sustainable environment.

LIFE ON LAND

LEAD COLLEGE OF MANAGEMENT GREEN CAMPUS REPORT 2023

To reduce carbon emissions and promote a pedestrian-friendly environment, we have designated parking areas outside the campus for automobiles and four-wheelers. This restriction encourages alternative modes of transportation, such as walking, cycling, and battery-powered vehicles, contributing to a greener campus.

LEAD COLLEGE OF MANAGEMENT GREEN CAMPUS REPORT 2023

Use of Bicycles/Battery-Powered Vehicles

We prioritize eco-friendly transportation options by providing a sufficient number of bicycles for students and faculty members. This promotes sustainable commuting within the campus and helps reduce reliance on fossil fuel-powered vehicles. Additionally, we encourage the use of battery-powered vehicles as a cleaner alternative for short-distance travel.

Pedestrian-Friendly Pathways

LEAD College of Management boasts well-designed and easily accessible pedestrian pathways throughout the campus. These pathways prioritize pedestrian safety and convenience, fostering a sustainable and walkable environment for our campus community.

We have taken a strong stance against plastic usage within our campus premises. A comprehensive ban on the use of plastic is in effect, promoting the adoption of eco-friendly alternatives and minimizing plastic waste generation. This proactive measure aligns with our commitment to environmental sustainability.

Landscaping

Greenery and landscaping initiatives play a crucial role in enhancing the aesthetic appeal and environmental quality of our campus. We have implemented extensive landscaping projects, including the planting of trees, shrubs, and green spaces, which not only beautify the campus but also contribute to biodiversity and ecological balance.
